EDUCATION

University | Year 2023
Collage of Science –
Computer Department,
BSc. Degree
Sulaymani

SKILLS

- Perfectionist
- Precise at work
- Ready to learn
- Hardworking
- Communication
- Problem Solving
- Leadership
- Time Management
- Decision Making
- Creativity

LANGUAGES

- Kurdish – Native language
- English – Excellent
- Arabic – Good

COMPUTER SKILLS

- Hardware
- Networking
- Languages and Frameworks: Java, Python, HTML, CSS, JS, Flutter, Node.js, PHP

CAREER OBJECTIVE

As a web development specialist, my aim is to obtain a position where I can utilize my technical expertise and diligent work ethic to craft inventive and user-friendly websites or web applications that fulfill the needs of both clients and end-users.

EXPERIENCE

Full-Stack Developer

2023 - PRESENT

- Acquired 6 months of experience as a full-stack developer with a focus on web development at "Stack Solvers." During this period, I gained valuable skills and hands-on experience with frameworks like React, ASP.NET Core, and Blazor.
- I have a solid understanding of various software development concepts, such as state management, OOP and UI/UX design. This expertise enables me to efficiently handle data, create modular code, and design user-friendly interfaces, contributing to the development of robust software solutions.

Software Developer

2019 - PRESENT

- Experienced in every software development field, including desktop applications, web design, back-end development and mobile applications.

Translator

2020 - 2021

- Worked for Kurdfilm website as a translator, translated some TV shows.
- Fluent in English.

PROJECTS

School Scout – Mobile application

2022 - 2023

- A responsive, fully functional and fast mobile application used to find schools, designed using Flutter.

SKILLS

Frameworks and Libraries

- I am proficient in front-end frameworks such as React and Blazor, with some experience in Vue.js. Additionally, I possess strong expertise in CSS frameworks, particularly with Tailwind.
- My expertise in back-end frameworks encompasses Node.js and ASP.NET Core. I have integrated concepts such as authentication and authorization using JWT, implemented file upload and compression, executed data validations, and employed a code-first approach for database designs.
- I have hands-on experience with both relational databases like SQL Server and MySQL, as well as non-relational databases such as MongoDB and Firebase Firestore.
